

Socioeconomic effects behind the capital region concentration in Korea

Table of contents

01

Background

General understanding and causes of overcrowding in metropolitan areas

02

Problems

- 1) Effects on Social cost
- 2) Housing price problems
- 3) Lack of research in regional communities and use of resources
- 4) Unemployment

03

Possible Solutions

04

Conclusion & Discussion

Seoul 2.8: 1 Busan

New York 2.15: 1 LA

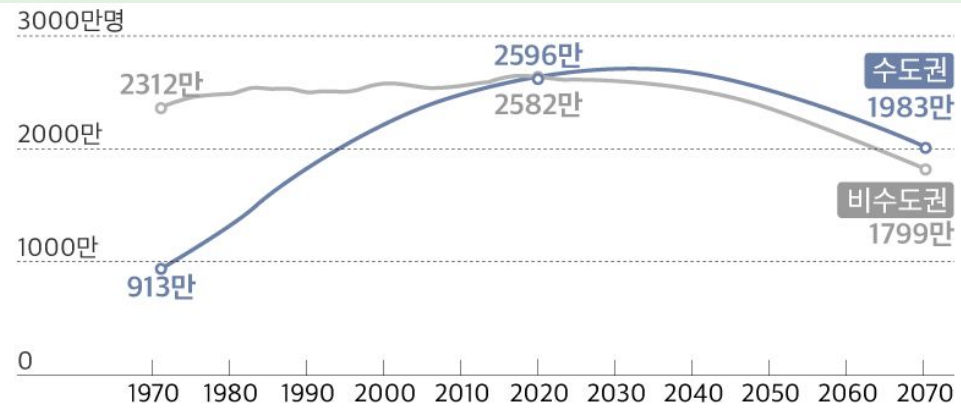

Tokyo 2.15: 1 Yokohama

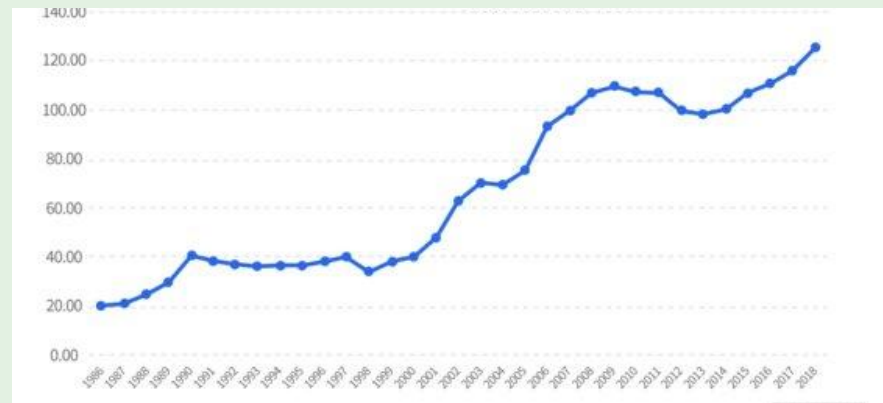

Chongqing 1.15: 1 Beijing

Population Trends and Prospects of Non-metropolitan Area in the Metropolitan Area

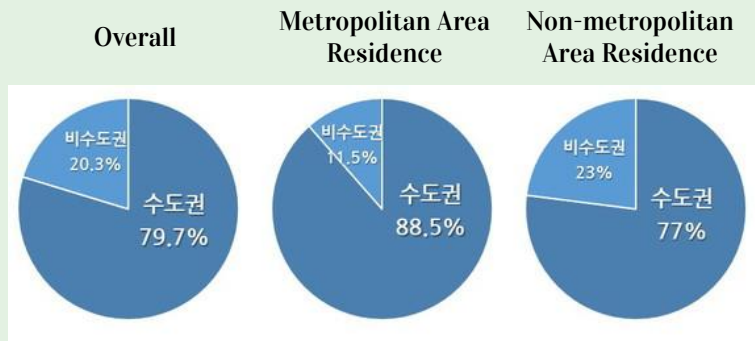

Apartment Price Index in the Seoul Metropolitan Area

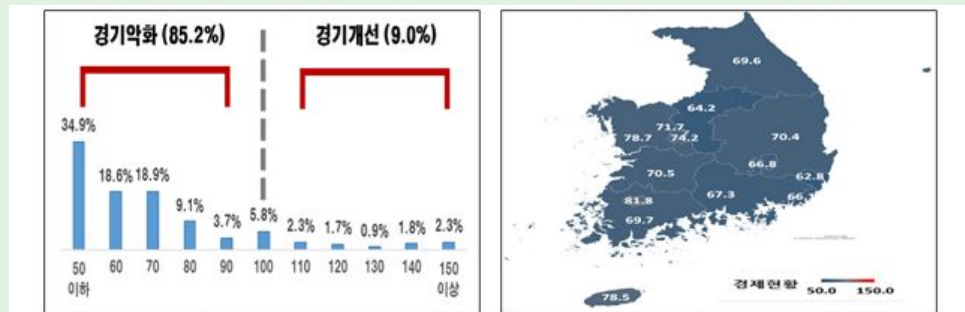

Why Seoul?

Survey Results for the Area of Desired Residence

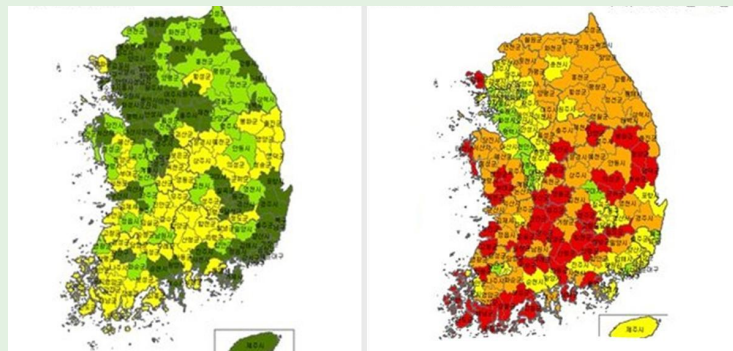

- ❑ Children's education
- ❑ Workplace accessibility
- ❑ Amenities•social infrastructures
- ❑ Economic conditions
- ❑ A concentration of public institutions

Regional Economic Levels in 2019 Economic Experience Level

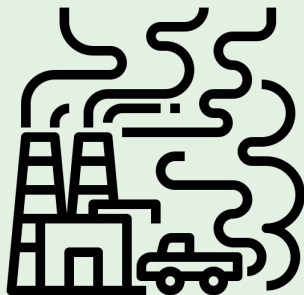

When the regional economic rate is 100, this year's regional economic level deteriorates below 100, and the improvement in excess of 100.

Local areas at risk of extinction

1. Overcrowded Expenses

(수도권 과밀비용)

Investment gap between metropolitan and non-metropolitan areas in 2022

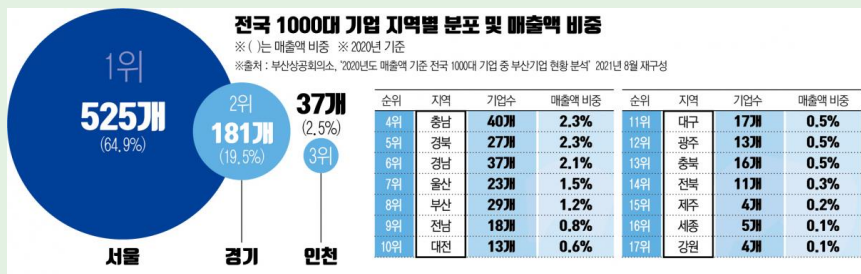

구 분		'17년	'18년	'19년	'20년	'21년	'22년 6월
수도권	서울	금액	12,719	17,097	23,041	21,831	43,243
		비중	58.1%	55.1%	59.6%	55.1%	61.4%
	인천	금액	467	722	1,065	758	1,358
		비중	2.1%	2.3%	2.8%	1.9%	0.6%
	경기	금액	4,843	7,480	6,579	8,397	13,071
		비중	22.1%	24.1%	17.0%	21.2%	18.5%
	소 계	금액	18,029	25,299	30,685	30,986	57,672
		비중	82.3%	81.5%	79.4%	78.2%	81.8%

The metropolitan area accounted for 47.6% of the population, 48.1% of GRDP, 46.2% of total companies, and 59.3% of the land value.

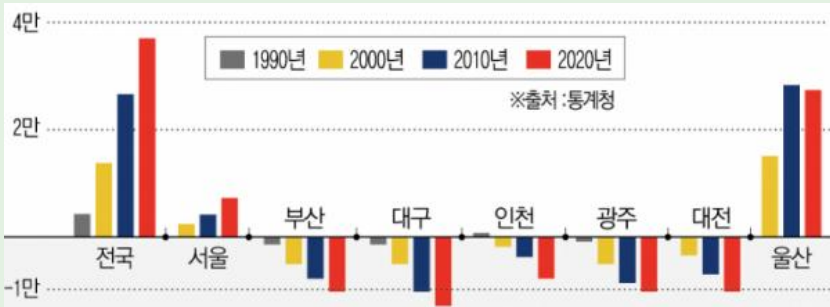

2. Local Hollowing Out Costs

(지방공동화비용)

- ❑ Transfer of school-age and productive-age groups to the Seoul metropolitan area
- ❑ The continuing deterioration of the local economy and the transfer of assets
- ❑ Regional hollowing out due to population decline

Trend of GRDP (Gross Regional Product) Gap per capita in metropolitan cities compared to the country

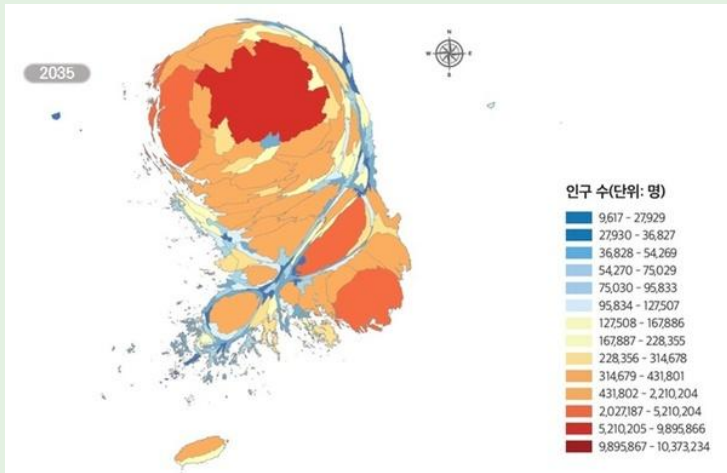

Low Birth Rate, Aging Future Prospects

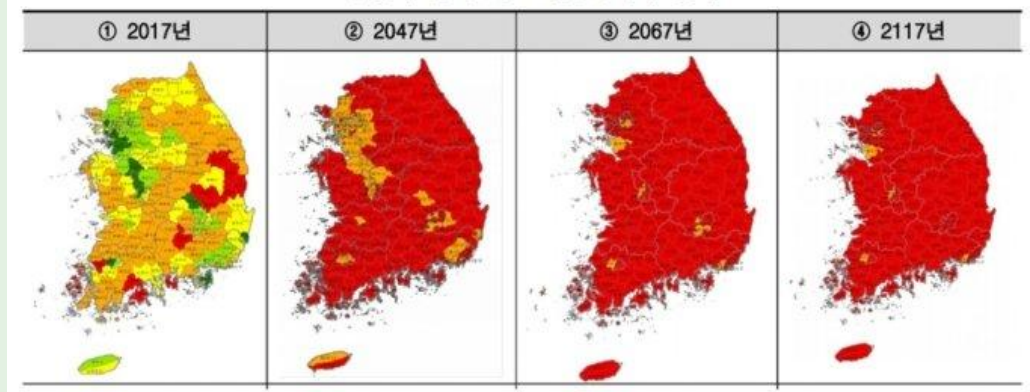

3. The risk of transformation into a Urban State (도시국가로의 변질 위험성)

2035 map of Korea

- ❑ A high possibility of population residing only in metropolitan areas (Hong kong and Singapore)
- ❑ Unique demographic characteristic among OECD countries with a population more than 40 million
- ❑ countries with a high proportion of top cities at risk of dictatorship and economic backwardness.

Analysis of future extinction risk areas

What are the possible solutions?

Relocation of public institutions to the provinces?

행정중심복합도시

Net population inflow rate by age group in 2021

The rate of production age population by cities and provinces in 2047.

What are the possible solutions?

Support for local traditional industries

(지방전통산업)

- ❑ Increasing industrial support to prevent the collapse of traditional local industries such as shipbuilding, electronics in North Gyeongsang Province, chemical complexes, and shipping in the Honam region
- ❑ creating good systems to help local young people get jobs in the province > prevent further overcrowding and soaring housing prices in Seoul.

Support for specialized universities

화학공학과 > 화학대학교, 화학신소재대학교
화공생명대학교

- ❑ Regional Economic Revitalization
- ❑ Improving awareness of local universities

Discussion Questions

- ❑ What are the possible solutions for ongoing concentration in capital areas?
 - ❑ What are the other social and economic effects of the capital region concentration in Korea?
 - ❑ What is your opinion/future prospect on current status of regional imbalance?
 - ❑ Do you think the economy will improve if balanced regional development occurs?
If so, how?
-
